# Tiki Island

By: Les Story, Luis Ortiz and Christopher Perez

We have very useful countries around us such as Australia, Indonesia, Philippines, China and New Zealand. We are also close to smaller islands that are not discovered, so we can use those islands for resources.

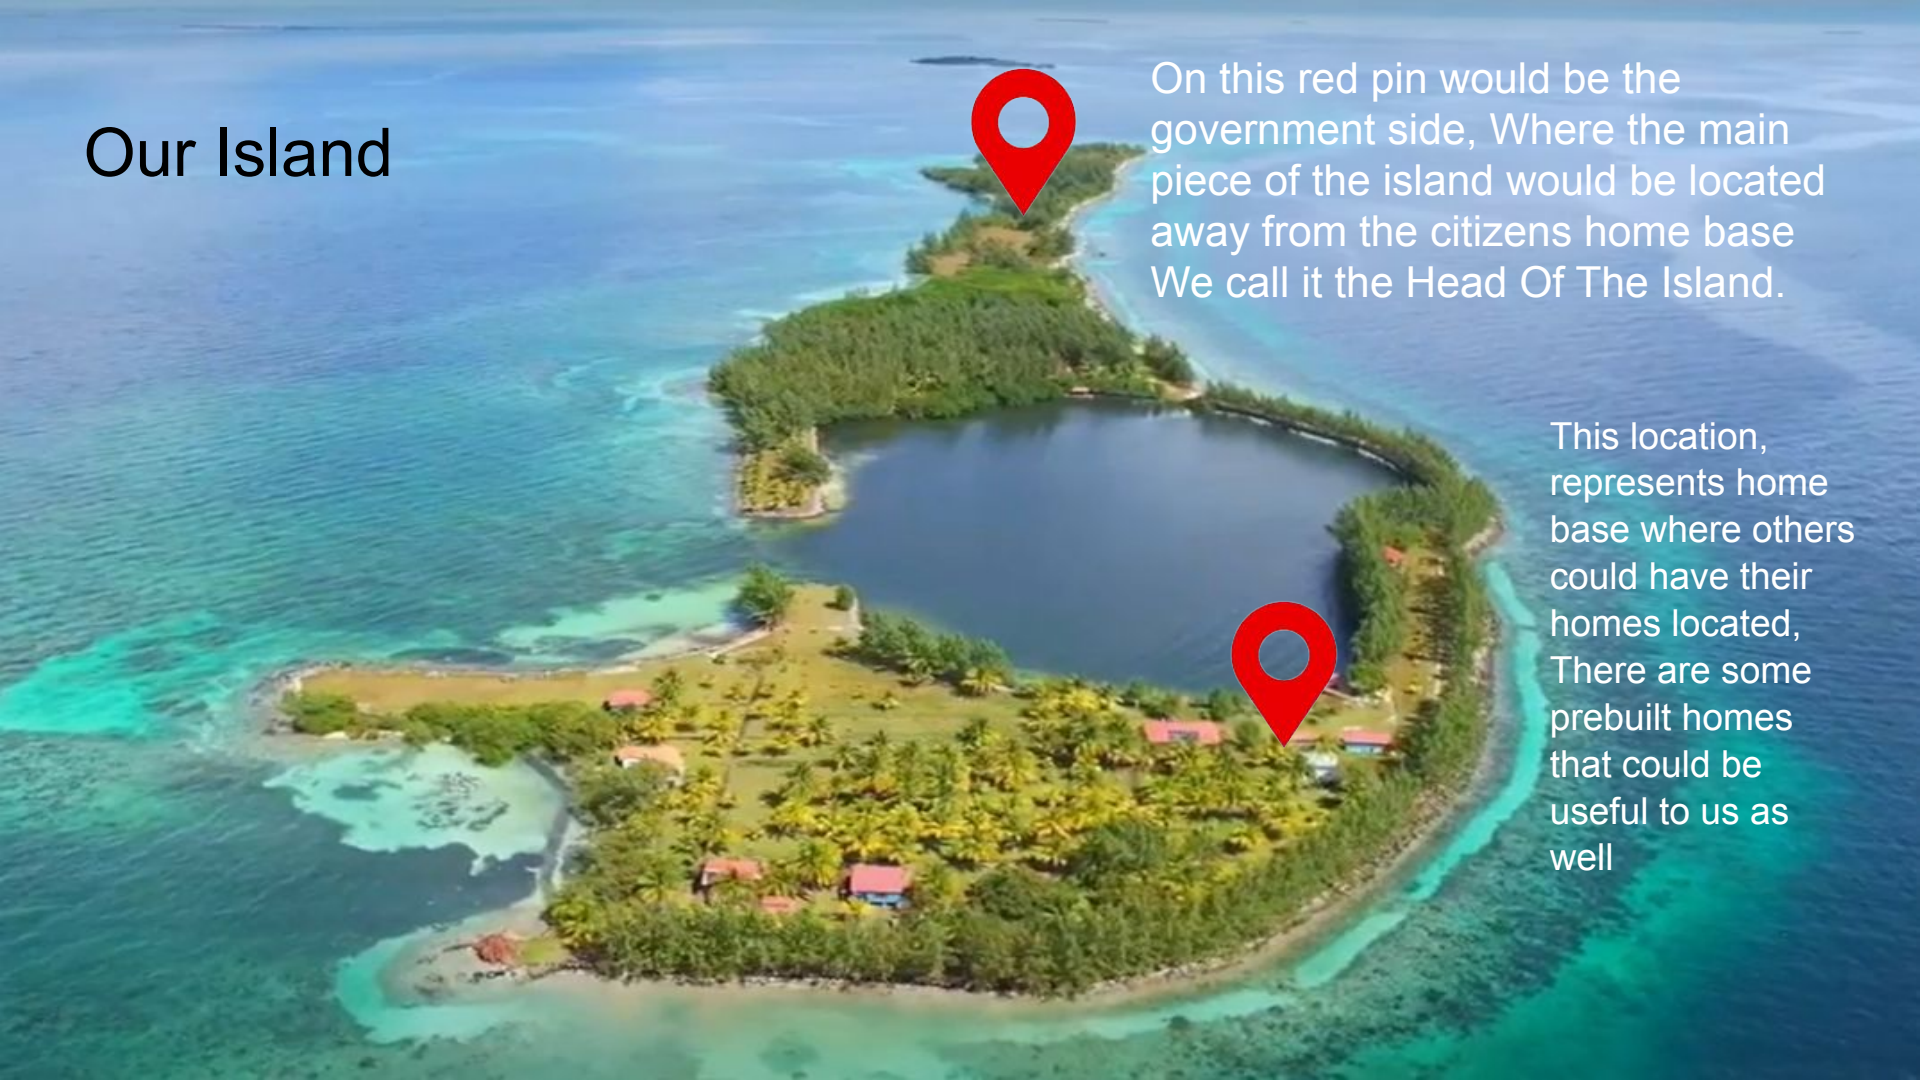
# Our Island



On this red pin would be the government side, Where the main piece of the island would be located away from the citizens home base We call it the Head Of The Island.

This location, represents home base where others could have their homes located, There are some prebuilt homes that could be useful to us as well

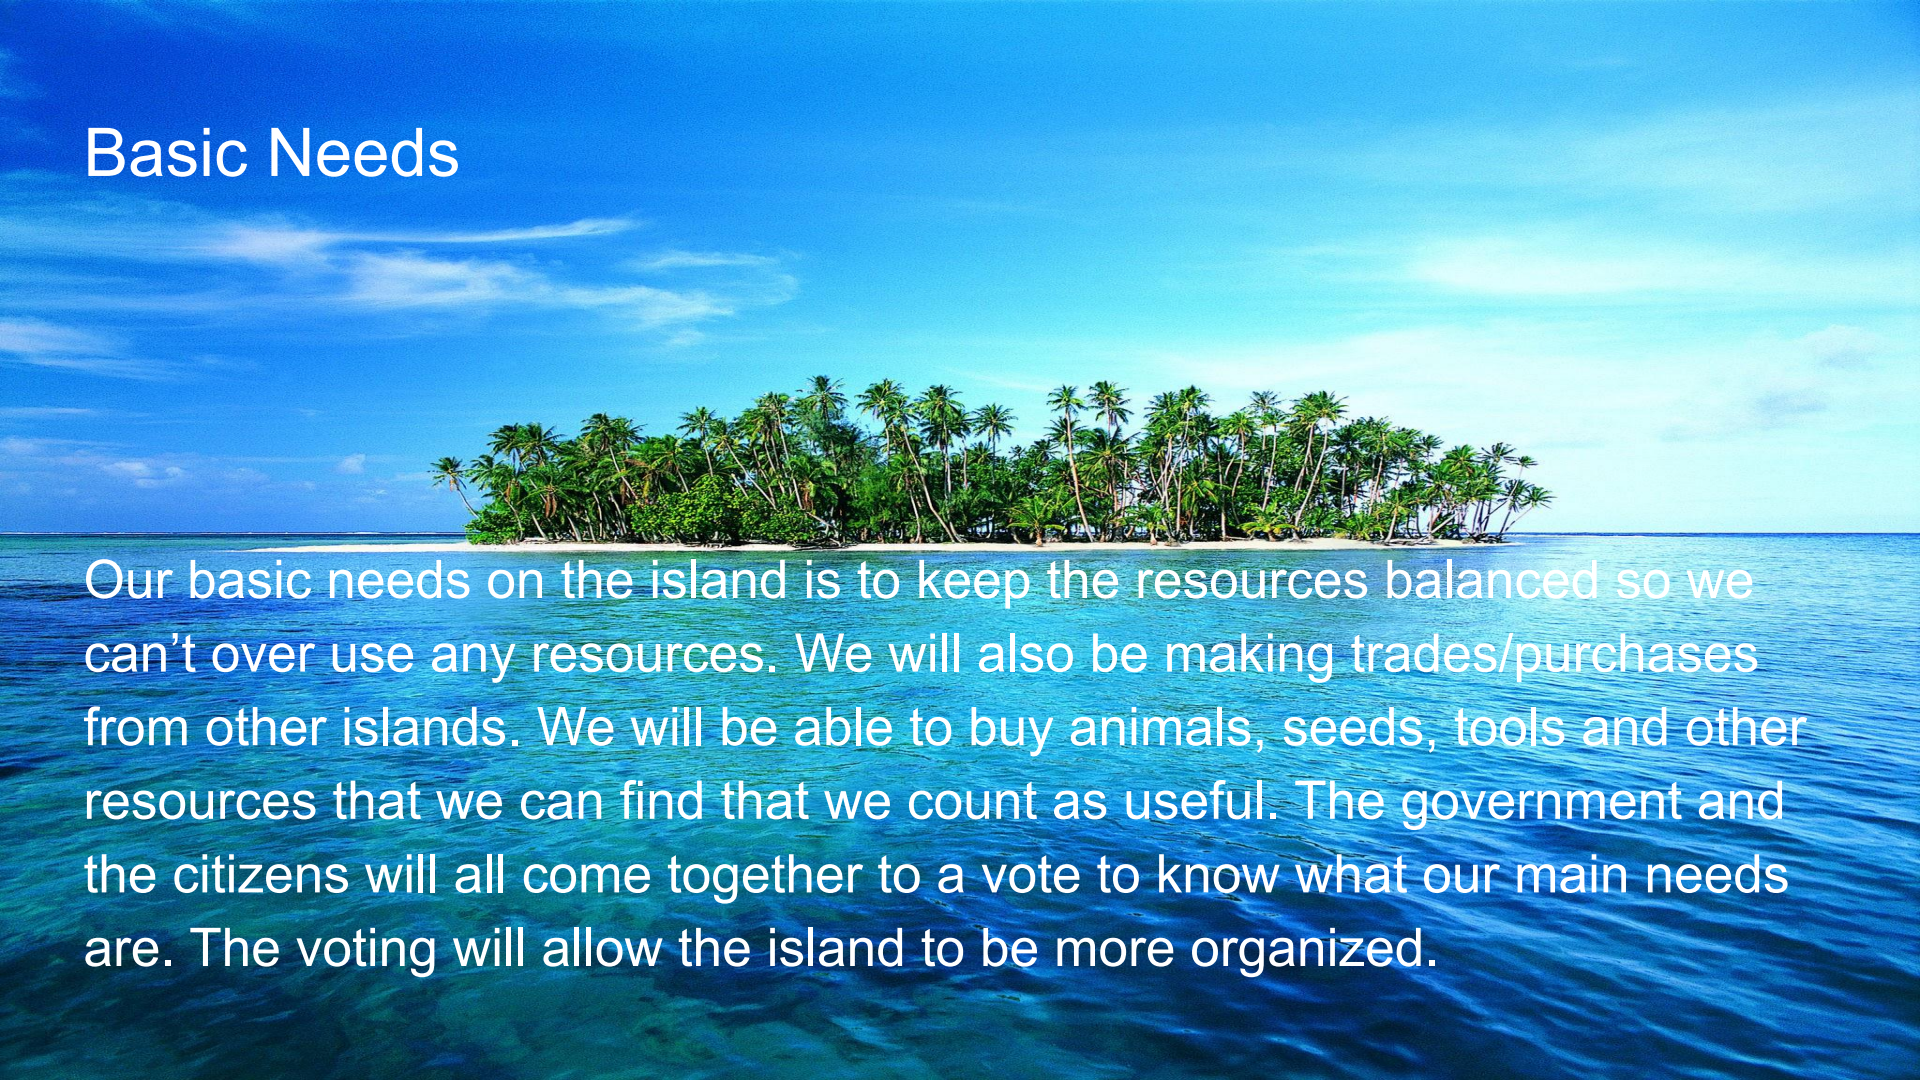
# Labor

We have different roles such as, Builder, Fisherman, Collector (Resources), Medic, Guard and Cook. The builders will think of things to make that would be beneficial to us, the fishermen will hunt sea life. The Collector’s will gather resources from the island that are useful. Medics will help with any injured citizens, and the cook will cook the food (Obviously). The guards will monitor on the island just in case any other boats from another country wants to visit the island, you never know what their intentions will be. The guards in general will keep our island safe from any harm. Each person does have their assigned jobs but could have more depending on the situation. We want hard workers that are up to the task of these roles. So men would be doing the hard roles and women would be doing the easier tasks such as being a cook or being a medic. If a role is to full such as builder for example and they want to become a fishermen, They can become one to evenly separate the jobs.

# Capital

The tools that we will use on the island are axes, shovels, Gardening Tools, Chainsaws, A Compass to know where we are going, Saw, Fishing Rod, Log Splitter. The main machines that are useful to us are Boats to travel across the waters, A Power Generator to gain power on the island, Sewing Machines to make/repair clothes. In Order to obtain these tools and machines, we will be using some of our resources to sell to other island's to make money in order to purchase the stuff we need. Since its a mixed economy we will be getting the citizens vote and if majority select yes we will do these trades.

# Basic Needs



Our basic needs on the island is to keep the resources balanced so we can’t over use any resources. We will also be making trades/purchases from other islands. We will be able to buy animals, seeds, tools and other resources that we can find that we count as useful. The government and the citizens will all come together to a vote to know what our main needs are. The voting will allow the island to be more organized.

# LAWS!

Citizens could come up with random a random bill, that the government has to AGREE on. If a bill is accepted by the Government it will turn into a law for the Island.

Examples Of Bills:

1. NO STEALING (If You Stole, Punishment Is Decided By The Government)
2. NO VIOLENCE OF ANY KIND
3. NO DRINKING UNDER THE AGE OF 21
4. NOT ALLOWING DICTATORS IN OUR GOVERNMENT (Want It As Fair As Possible)
5. NO POLITICAL PARTIES
6. IMMIGRATION IS ALLOWED (With a clean background)
7. NO CULTS
8. NO TRANSPORTATION OF HARDCORE ILLEGAL DRUGS
